

# Fraction Wall

## Challenge Cards

### Fraction Wall Challenge Cards

1. Can you use  $<$ ,  $>$  or  $=$  to solve these problems?

$$\frac{1}{2} > \square$$

twinkl.co.uk

### Fraction Wall Challenge Cards

2. Can you use  $<$ ,  $>$  or  $=$  to solve these problems?

$$\frac{2}{4} = \square$$

twinkl.co.uk

### Fraction Wall Challenge Cards

3. Can you use  $<$ ,  $>$  or  $=$  to solve these problems?

$$\frac{1}{3} < \square$$

twinkl.co.uk

4. Can you use  $<$ ,  $>$  or  $=$  to solve these problems?

$$\frac{1}{\square} < \square$$

5. Can you use  $<$ ,  $>$  or  $=$  to solve these problems?

$$\frac{3}{4} > \square$$

6. Can you use  $<$ ,  $>$  or  $=$  to solve these problems?

$$\frac{1}{4} < \square$$

7. Can you use  $<$ ,  $>$  or  $=$  to solve these problems?

$$\frac{\square}{4} < \square$$

8. Can you use  $<$ ,  $>$  or  $=$  to solve these problems?

$$\frac{3}{3} = \square$$

9. Can you use  $<$ ,  $>$  or  $=$  to solve these problems?

$$\frac{2}{3} > \square$$

10. Can you use  $<$ ,  $>$  or  $=$  to solve these problems?

$$\frac{2}{2} = \square$$

# Fraction Wall Challenge Cards **Answers**

1.  $\frac{1}{2} > \frac{1}{4}$  or  $\frac{1}{2} > \frac{1}{3}$

2.  $\frac{2}{4} = \frac{1}{2}$

3.  $\frac{1}{3} < \frac{2}{3}$  or  $\frac{1}{3} < \frac{3}{3}$  or  $\frac{1}{3} < 1$  or  $\frac{1}{3} < \frac{1}{2}$  or  $\frac{1}{3} < \frac{2}{2}$  or  $\frac{1}{3} < \frac{2}{4}$  or  $\frac{1}{3} < \frac{3}{4}$  or  $\frac{1}{3} < \frac{3}{3}$

4.  $\frac{1}{2} > \frac{1}{4}$  or  $\frac{1}{2} > \frac{1}{3}$  or  $\frac{1}{3} > \frac{1}{4}$

5.  $\frac{3}{4} > \frac{2}{4}$  or  $\frac{3}{4} > \frac{1}{4}$  or  $\frac{3}{4} > \frac{1}{2}$  or  $\frac{3}{4} > \frac{1}{3}$  or  $\frac{3}{4} > \frac{2}{3}$

6.  $\frac{1}{4} < 1$  or  $\frac{1}{4} < \frac{1}{2}$  or  $\frac{1}{4} < \frac{2}{2}$  or  $\frac{1}{4} < \frac{1}{3}$  or  $\frac{1}{4} < \frac{2}{3}$  or  $\frac{1}{4} < \frac{3}{3}$  or  $\frac{1}{4} < \frac{2}{4}$  or  $\frac{1}{4} < \frac{3}{4}$  or  $\frac{1}{4} < \frac{4}{4}$

7.  $\frac{2}{4} > \frac{1}{4}$  or  $\frac{2}{4} > \frac{1}{3}$  or  $\frac{3}{4} > \frac{1}{2}$  or  $\frac{3}{4} > \frac{2}{4}$  or  $\frac{3}{4} > \frac{1}{4}$  or  $\frac{3}{4} > \frac{2}{3}$  or  $\frac{3}{4} > \frac{1}{3}$

8.  $\frac{3}{3} = \frac{2}{2}$  or  $\frac{3}{3} = \frac{1}{1}$

9.  $\frac{2}{3} > \frac{1}{3}$  or  $\frac{2}{3} > \frac{2}{4}$  or  $\frac{2}{3} > \frac{1}{4}$  or  $\frac{2}{3} > \frac{1}{2}$

10.  $\frac{2}{2} = 1$  or  $\frac{2}{2} = \frac{3}{3}$
